

Yasaman Etesam

Contact: (+1)-236-868-7148, E-mail: yetesam@sfu.ca

Education

- **Simon Fraser University** Burnaby, Canada
MSc of Computing Science 2017-Present
- **University of Tehran** Tehran, Iran
BSc of Electrical Engineering 2012 - 2017

Publication

- G.D. Finlayson, M.S. Drew, Y. Etesam (forthcoming 2018). Colour Image Gradient Regression Reintegration. IST Color and Imaging Conference 2018 (CIC26)

Skills

- **Programming Skills**
Matlab, Python, C++, C, Arduino, Verilog, Assembly
- **Microsoft Office**
Word, Excel, PowerPoint, Latex
- **Language**
Persian: Native and English: Fluent

Work Experience

- Mentor of Computer Vision in the "Invent the Future" program Summer 2018
 - It's program for introducing AI to high school students
 - Working on food classification
- Teaching assistant of Introduction to computing science and programming for mathematics and statistics Spring 2018
 - Grading, doing Office hours, lab supervising, and invigilating exams
 - Around 50 students
 - The course was about C++ which helped me learn more about it
 - working with linux command line
- Teaching assignment of Operation Research 2016
 - Grading around 20 students
- Teaching assistant of Engineering Probability and Statistics 2016

Research Experience

- **Research Assistance at Vision and Media lab** Fall 2017 - Present
 - Working on Intrinsic Images
 - Transferring night-time image to day-time image
- **Subspace Recovery with Angular Gaussian Distribution using MATLAB** Iran, 2016
 - Implementing Angular Gaussian method for multiple subspace recovery by using Mixture Models
 - Compare other methods like SSC, LRR, RANSAC, etc with the Angular Gaussian method based on their classification error
 - Trying to use robust approaches and make the method to be as robust as possible
- **Controlling Gain and Offset of Brain Signals Using Arduino** Iran, Summer 2015
 - Amplifying the brain signals and then implementing a program which controlled these signals
 - After connecting the input, the circuit would control the gain, and the offset such that it could be completely shown on the screen in its maximum size

Academic Projects

- Image shadow removing with minimizing entropy implementing with MATLAB Spring 2018
- Classification over Persian poems with neural networks with Python Fall 2017
- Design and implementation of an Inverted pendulum controller with MATLAB Fall 2016
- Design and implementation of an Inverter(DC/AC) circuit Fall 2015
- Design and implementation of a Boost circuit with a closed loop controller Fall 2015
- Designing and implementation of an oscilloscope on FPGA, using Quartus Fall 2015
- Design and implementation of a Phonebook with CodeVision Fall 2014
- Design and implementation of Line follower Robot with CodeVision Fall 2013
- Implementation of Super Mario game with C Fall 2012

Honours

- **Rank 445 National Entrance Exam** Iran, 2012
Ranked 445th among more than 260,000 participants in Mathematical Sciences
- **Semifinalist in national math olympiad** Iran, 2010

- **NODET**

Iran, 2002-2011

A member of National Organization for Development of Exceptional Talents (NODET), which selects students with exceptional education abilities

Certifications

- Completed Machine Learning from Stanford University, Online Course by Coursera, Final Grade 97.3/100 2016
- Certification for attending a conference entitled 'A Day with Neuroscience' Iran, 2015
