

PERSONAL DETAILS

Birth September 19, 1994
Address Department of Electrical Engineering
University of Tehran
Tehran, Iran
Mobile (0098) 937-949-1939
E-Mail yasaman.etesam@gmail.com

RESEARCH INTERESTS

Machine Learning
Machine Vision
Pattern Recognition
Human Computer Interaction

EDUCATION

Electrical Engineering (Major: control)

University of Tehran, Tehran, Iran
Current GPA: 3.57/4 (16.67/20)
Last 3 semester GPA: 4/4 (17.8/20)
Expected Date of Graduation: February 2017

Diploma in Mathematical Sciences

2007-2010

Farzanegan(NODET) High school, Iran, Ahvaz
High School Diploma GPA: 19.61/20

PROFESSIONAL EXPERIENCE

Research Assistant

University of Tehran, Tehran, Iran, 2016

Supervisor: Dr. Reshad Hosseini

Project: Subspace Recovery with Angular Gaussian Distribution

Angular Gaussian method is a new robust approach for subspace recovery; however, this method was not used for multiple subspaces. In this project, I implemented Angular Gaussian method and some other state-of-the-art methods such as SSC and LRR which was robust and used for multiple subspaces. I used these methods for recovering subspaces in some artificial and real data. In two and three dimensions I plotted subspaces and calculated classification error and also, as the second error, I calculated the angle between real subspaces and the subspaces which was given as the output of the methods. For higher dimensions, I just calculated classification error. After that, I attempted to compare these approaches based on their errors on a same data. I used MATLAB for this project.

Intern

University of Tehran, Tehran, Iran, 2015 Summer

Supervisor: DR. Kamalodin Setarehdan

Project: Controlling the Gain and the Offset of Brain Signals

The brain signals are so weak. In this project, I amplified these signals and then I implemented a program which controlled these signals. So, when you connected the input, the circuit controlled the gain and the offset of the signal such that it could be completely shown on the screen in its maximum size and also the program given us the gain and the offset. I used Arduino for this project.

ACADEMIC PROJECTS

Implementing of SuperMario game with C

Introduction to Computing Systems and Programming, Fall 2012

Advisor: Dr. Hadi moradi

Design and implementing Routing Robot with CodeVision

General Workshop, Fall 2013

Advisor: Dr. Mehdi Fakhraei

Design and implementing a Phonebook with CodeVision

Microprocessor, Fall 2014

Advisor: Dr. Omid Fatemi

Designing and implementing an oscilloscope on FPGA, using Quartus

Digital Logic Design Lab, Fall 2015

Advisor: Dr. Zeinolabedin Navabi Shirazi

Design and implementing a Boost circuit with a close loop controller

Industrial Electronics, Fall 2015

Advisor: Dr. Hossein Imaneini

Design and implementing an Invertor(DC/AC) circuit

Industrial Electronics, Fall 2015

Advisor: Dr. Hossein Imaneini

Design and implementing an Inverted pendulum controller with MATLAB

Mechatronics, Spring 2016

Advisor: Dr. Toraj Abbasian Najafabadi

RELEVANT COURSES

Probability and Statistic

17.2/20

Lecturer: Dr. Behrooz Maham

Numerical Calculation

18.8/20

Lecturer: Dr. Rohollah Abedini

Calculus

18.25/20

Lecturer: Dr. Narges Gharghani

Operation Reasearch

18.25/20

Lecturer: Dr. Reshad Hosseini

Linear Algebra <i>Lecturer: Dr. Arta Jamshidi</i>	20/20
General Workshop <i>Lecturer: Dr. Mehdi Fakhraei</i>	19.5/20
Electrical Workshop <i>Lecturer: Dr. Behzad Asaii</i>	19.5/20
Electronic 1 <i>Lecturer: Dr. Mohammadreza Kolahdüz</i>	17.25/20
Circuit and Measurement Lab1 <i>Lecturer: Shima Rezaii</i>	19.9/20
Linear Control Systems <i>Lecturer: Dr. Toraj Abbasian Najafabadi</i>	17.7/20
Linear Control Systems Lab <i>Lecturer: Dr. Mohammadjavad Yazdanpanah</i>	17.16/20
Discrete-Time and Nonlinear Control Systems <i>Lecturer: Dr. Mehdi Hosseinzadeh</i>	17.7/20
An Introduction To Biomedical Engineering <i>Lecturer: Dr. Kamalodin Setarehdan</i>	17.5/20
Physiology1 <i>Lecturer: Dr. Mohammadreza Raufi</i>	18.5/20
General Chemistry <i>Lecturer: Dr. Akram Hosseinian Serajelo</i>	20/20

TEACHING

Teaching Assistant

Operation Research, Instructor: Dr. Arta Jamshidi
2016-present

Teaching Assistant

Probability and Statistics, Instructor: Dr. Behnam Bahrak
2016-present

HONORS

Rank 445 National Entrance Exam

Islamic Republic of Iran, 2011

Ranked 445th among more than 260,000 participants in Mathematical Sciences

Semifinalist in national math olympiad

Islamic Republic of Iran, 2010

NODET

Islamic Republic of Iran, 2002-2011

A member of National Organization of Development of Exceptional Talents (NODET), which selects students with exceptional education abilities

CERTIFICATIONS

1.Certification for attending a conference entitled ‘A Day with Neuroscience’
Islamic Republic of Iran, 2015

2.Completed Machine Learning from Stanford University, Online Course by Coursera
Final Grade 97.3/100
2016

COMPUTER SKILLS

1. Programming Languages: C, Verilog, Assembly
2. Applications: MATLAB, Arduino, CodeVision, Proteus, Quartus, ModelSim, Altium Designer, Multisim, Pspice
3. Microsoft Office: Word, Excel, Powerpoint, Latex

LANGUAGE SKILLS

Persian: Native

English: Fluent

TOEFL: $104=29(\text{reading})+27(\text{listening})+23(\text{speaking})+25(\text{writing})$

GRE: $163(\text{quantitative})+147(\text{verbal})+3(\text{writing})$
